

Ductile Iron Pipes and Fittings

Product Range

● Pipeline Products

Pipes and Fittings

Flanged Pipes

Size Range: DN 50 to 1600 (Fixed Flange)

Length: min 100mm (DN50)
max 5250mm (DN500)

Socketed Pipes

Size Range: DN 80 to 1200

Length: To BS EN 545/598

Flanged Fittings

Size Range: DN 50 to 1600 (Fixed Flange)

Socketed Fittings

Size Range: DN 80 to 1200

● Valves

Gate Valves, Butterfly Valves,

● Municipal Castings

Manhole Covers

● Steel Fabrications

Galvanised covers and frames

The range of products offered by CIS is an extensive one. Products are being added continuously and can also be made to customers specific requirements. Further information can be seen overleaf, alternatively for full information relating to the CIS range please contact the CIS Customer Service Team at the telephone number shown below.

CIS has been one of the largest British manufacturers and suppliers of Ductile Iron Pipes and Fittings since 1977.

Now a part of Tyco Waterworks, CIS benefits from the significant support and resources of the Tyco group including its UK and international sister organisations and now offers an improved package of quality products exactly suited to customer's individual requirements.

Standards

CIS supply the full range of fittings covered under the requirements of the EN 545 and EN 598 standards and international ISO standards

- EN 545:1994 Ductile Iron pipes and fittings for clean water pipelines
- EN 598:1994 Ductile Iron pipes and fittings for sewage applications
- ISO 2531:1998 Ductile Iron pipes and fittings (International Standard)

All pipes and fittings are pressure tested to EN545 and 598 standards prior to despatch.

General application

CIS supply a complete package of quality products into a variety of markets both within the UK and internationally.

- The Potable Water Industry
Pipes and Fittings to EN545
- The Waste Water Industry
Pipes and Fittings to EN598
- The Fire Protection Industry

CIS supply Ductile Iron pipe, valves and fittings to the major water utilities and their contractors and can supply products for typical projects such as:

- Sewage Treatment Works,
- Pumping Stations,
- Water Reticulation Systems
- Fire Protection Systems.

CIS - Cast Iron Services

Cast Iron Services has been supplying high quality pipes and fittings into the UK water and municipal industries for more than 25 years. During that time CIS has established a reputation for quality, dependability and the the high levels of service and support that customers demand.

The CIS facilities in the Midlands allows the fabrication of fittings and pipes as well as a variety of other related products such as man hole ladders. These products can be produced to internationally recognised standards or alternatively to the customers exact specification.

CIS fabricated pipe fittings are regarded by the industry as being of the highest quality with all pipes and fittings being pressure tested to EN 545 and EN 598 standards prior to despatch.

The customer service team at CIS is made up of knowledgeable individuals with many years experience in the pipe and fittings industry. They are able to help with the many questions customers may have when specifying and quoting pipes, valves and fittings as well as being able to address many of the general issues that arise during the specification process.

Please call the CIS Customer Service team on the number shown below for all your specification and pricing enquiries.
